

UPSTATE DOOR®
FINE DOOR SOLUTIONS... ONE SOURCE

MDF DOOR SOLUTIONS
Superior Double Refined MDF

MDF is preferred for interior paint grade applications because it provides a smoother finish than wood

CALL OR VISIT OUR WEBSITE FOR MORE DETAILS

What is MDF and Why Should You Select MDF Over Wood?

- MDF is medium density fiberboard, which is an engineered wood product created from recycled wood product
- We use double refined MDF, which is stronger and denser than standard MDF
- MDF offers the least amount of warping and its heavyweight material helps with sound control
- It provides a clean, polished edge and is smoother for painting
- MDF is a more cost effective option than wood
- MDF has a higher sound barrier than wood
