FINE DOOR SOLUTIONS... ONE SOURCE

## MIRACLE DOORS

*A popular timeless design*

The Miracle Door is a historic door design that originated in the 1920s. The elegant door-within-a-door design was copied by many manufacturers during the 1930s and 1940s because of its simplistic design and structural stability.

Upstate Door has recreated the Miracle Door crafted out of fine materials for the person looking to match historical charm throughout a home!

Each piece is machined out of a solid piece of wood, then coped together so they sit in each other to look like a door within a door.

All of our Miracle Doors are completely customizable to your preferences, and are constructed with the following:

- Stile and rail construction
- Cope and dowel construction
- Hand selected lumber
- Engineered stiles (1/8" face ply)
- Floating panels

Upstate Door leverages expertise along with precise machining to construct an architecturally driven Miracle Door that goes above and beyond the original design to provide beautiful heirloom doors to match your style.

**Upstate Door offers an elegant, historical design paired with structural stability**
