WHY USE UPSTATE DOOR?

Upstate Door is known for our custom capabilities and for manufacturing unique designs. We are able to create exceptional architectural designs that are both beautiful and functional. Window manufacturers are able to create standard shaped windows with standard profiles, where we have the capabilities to take wooden windows to the next level.

We can create custom wooden circular, oval, elliptical, square, or rectangular cased stationary windows with solid wood frames. Muntins can be completely customized to any design and are crafted out of one single piece of wood, eliminating any chance of shifting or movement.

All items on our fine wood windows can be matched to the doors or window packages on the home: profiles (SDL or TDL), wood species, finishing, and glass options. Leaded glass options are also available. If you can dream it, we can create it!

A variety of exterior and interior casing options can be created to fit perfectly around the window and can be sent loose for your contractor to install.

DESIGN FLEXIBILITY

It's important to have the ability to match your doors and windows in the home so your design is consistent. We have unlimited options available to match your vision:

- Panel raises
- Sticking
- Muntins
- Glass type
- Screen type
- Wood species
- Hardware
- Layout
- Match transom or sidelites
- Same finish throughout

WINDOW TYPES

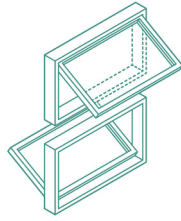

*Screens can be added in most configurations.
Please note: We are not offering double hung or crank casement windows.*

Operable Windows

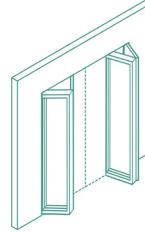

CUSTOM HISTORIC CASEMENT WINDOWS

Outswing casement windows have hinges along one of the sides. Custom screen/storm casement windows can be included to match.

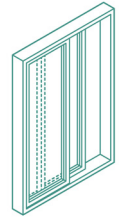

AWNING / HOPPER WINDOWS

An awning or hopper window is a window that opens with hinges along the top or the bottom. A screen can be included in the frame or an additional sash can be included.

BIFOLD WINDOWS

A bifolding window folds up and stacks in place to allow for an open indoor/outdoor living space.

LIFT + SLIDE WINDOWS

A lift and slide window sits on unique hardware that lifts the unit and slides across the track along the bottom while opening. When closed, the handle lowers the window and seals it into place.

Stationary Windows

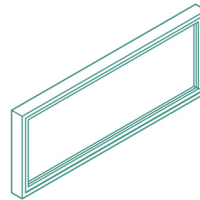

ARCHITECTURAL FIXED WINDOWS

A fixed window is non-operational. It is a window that is secured in place.

DIRECT SET SIDELITES + TRANSOMS

A direct set sidelite or transom is when the glass is mounted directly into the frame for a seamless and modern look.

TRANSOMS

A transom is a window that is installed horizontally above the door & sidelites, if there are any. It can be stationary or operable.

SIDELITES

Sidelites are vertical windows placed on either side of a door. They can be stationary or operable.

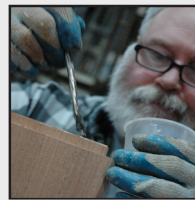

WINDOW CONSTRUCTION

Genuine stile and rail construction adds structure and stability to every window

Joints are coped and doweled to create a long lasting, high quality product

Marine epoxy is used on exterior windows; exterior grade glue is used on interior windows

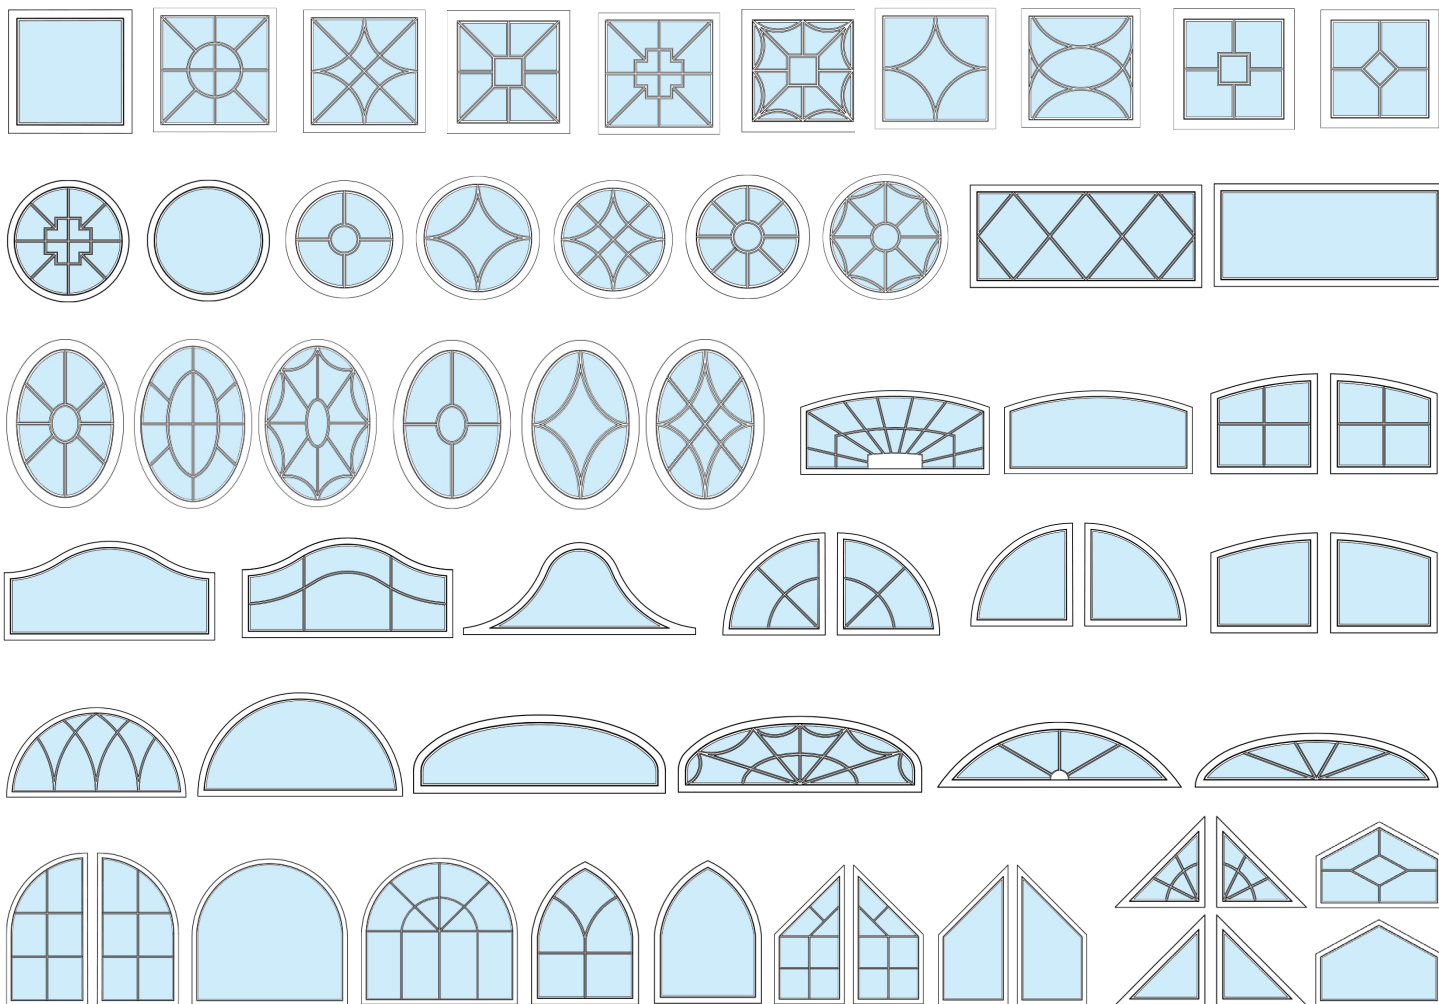

Muntins are doweled for added strength and support

LAYOUT INSPIRATION

Choose from our many options, or, create your own layout!

FINE FINISHING SOLUTIONS

Let Upstate Door save you time by prefinishing your windows in the factory before being shipped to you! Our finishing is done in a controlled environment to prevent dust or other imperfections getting in the finish. The finish is sprayed, not brushed, to offer a more consistent coating, and is a sheen-30 satin finish.

Finishing by the manufacturer ensures hard-to-reach areas are covered, including:

- Behind the glass (we paint or stain before the glass is installed)
- In and around all areas that were machined for hardware (behind the hinges, inside the bore)
- Behind the sticking and the spline of a screen
- Backside of the muntins and jambs
- All six sides of a window (front, back, top, bottom, and both side edges)

Below are Upstate Door's variety of stain options featured on African Mahogany. We can also produce split finishes to match the outside of the home as well as the inside of the home. All of our finishes are a sheen-30 (satin) finish. We have the ability to match paint colors from many major manufacturers; just provide a color name or ID code and we can do the rest. Or, select just a clear top coat to highlight the natural beauty of the wood.

Stain Options

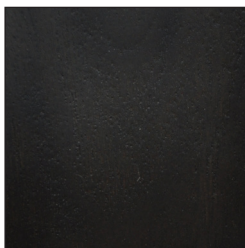

Shown on African Mahogany. Note that finishes will look different on other wood species.
